Subject: Stoller Winery

Dear Mr. Pelsler,

I would like to thank you and your associates for the excellent work done for the Stoller Winery Project. Your craftsmanship is superb, and your staff is top notch and easy to work with. I really feel that I was working with the best of the best. With an almost impossible schedule, you were able to complete the systems that were needed for harvest. When we had problems with a manufacture's valves, you willingly stepped up and took care of the issue. You have my gratitude for that.

I am truly looking forward to working with you again in the future. When you build one of our designs, I know that it will be done to the highest standard.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tamela J. Toyoda', written in a cursive style.
