

NEUDORFER ENGINEERS INC
Consulting Engineers
Seattle ♦ Portland ♦ Guam

Air and Water Balancing
Sound and Vibration Testing
Cleanroom Services

February 16, 2006

To Whom It May Concern:

I have worked with Hunter-Davisson Mechanical Contractors in my capacity as Portland Branch Manager of Neudorfer Engineers, Inc., since the year 2000. During that time Neudorfer Engineers has been hired by Hunter-Davisson to perform test, adjust, and balance services and/or commissioning services on more than 100 projects, ranging in size from small to large.

My staff and I find it a pleasure to work with Hunter-Davisson. The high quality of their work enhances our ability to complete our work in a timely fashion. When performing their work they keep in mind the engineer's design intent, which eliminates many possible problems in the course of the project. We find them professional and effective and easy to work with because they are team players.

An additional important aspect of working with Hunter-Davisson is that they pay their bills very, very promptly. Thus, our accounting staff enjoy working with them, also.

Please contact me if you would like further information.

Sincerely,

Mike Vawter, PE
Branch Manager
