

February 17, 2006

Our main goal in 2005 was to have our first "crush" in the new winery on site at Stoller Vineyards. By July of that year, things were not looking very positive that we would make the mid September date when harvest starts. Hunter-Davisson, understanding our desires and dilemma, went into overdrive and completed the necessary work for our fermentation equipment to be up and running in time for that harvest. Our '05 vintage is now barrel aging in the cellar. This was possible in large part to the fine men from Hunter-Davisson that worked overtime to achieve this goal. Many thanks to them for that effort!
